Market Mind: Generative AI-Powered Sales & Marketing Intelligence Platform

Abstract:

The rapid advancement of Artificial Intelligence (AI) is transforming modern business operations by enabling organizations to analyze data, automate processes, and make faster, data-driven decisions. Traditional sales and marketing systems often depend on manual analysis, static reports, and limited customer insights, making it difficult to identify market trends, predict customer behavior, and develop effective marketing strategies. To address these challenges, this project proposes Market Mind: Generative AI-Powered Sales & Marketing Intelligence Platform, an enterprise-level web application that integrates Generative AI, Large Language Models (LLMs), Retrieval-Augmented Generation (RAG), customer analytics, and Business Intelligence into a unified platform.The system is developed using Python, Django, and MySQL, with the Groq API and Llama 3.3 70B model providing AI-powered business assistance. It supports customer, sales, and marketing analytics, customer behavior prediction, personalized marketing campaign generation, automated report generation, interactive dashboards, and intelligent document search. The RAG-based document intelligence module enables users to upload PDF and DOCX files, perform semantic searches, and obtain context-aware answers with source references..The project contributes to **SDG 8:** Decent Work and Economic Growth by improving business productivity, reducing repetitive manual work, and supporting sustainable organizational growth. It also supports **SDG 9:** Industry, Innovation and Infrastructure by applying advanced AI technologies and scalable digital infrastructure. Overall, Market Mind provides an integrated, intelligent, and efficient platform for data-driven sales and marketing decision-making.

Keywords: Generative AI, Large Language Models, Retrieval-Augmented Generation, Business Intelligence, Sales Analytics, Marketing Analytics, Customer Behavior Prediction, Semantic Search, AI Assistant

Supervisor Approval

I hereby approve the above abstract for Major Project development.

Name of the Supervisor: Mrs. Syeda Zeba Qureshi
